

GUIDELINES FOR VOTERS

Health protocols for voters:

Voters are highly encouraged to wear cloth face coverings over their nose and mouth while in the polling place. If you do not have a face mask, one will be provided to you at your precinct.

Voters should cover coughs and sneezes with a tissue or the inside of their elbow and throw used tissues in a trash can.

Hand sanitizer will be provided for voters' use and should be placed at frequently used locations, such as check-in tables and exits. Voters will be expected to wash or disinfect their hands upon entering the polling place, after interaction with election workers, poll watchers, or other individuals at the polling place and after using a voting machine.

Voters will also be expected, to the extent feasible while at the polling place, to maintain at least six feet of distance from other individuals not within the same household.

If an election worker is unable to determine the identity of a voter wearing a face covering, the voter should be prepared to lower or temporarily remove the face covering when checking in. After the voter's identity has been confirmed, the voter should wear the face covering until they leave the polling place.

Voters are encouraged to have their ID ready before they enter the polling place, bring their own hand sanitizer and pen (to sign the precinct register), and to adopt additional protocols consistent with their specific needs and circumstances.

Voters should verify the location of their polling place, review their sample ballot, and that their registration information is correct before going to the polls. This information can be checked on the GeauxVote online portal by visiting GeauxVote.com.

Voters receiving assistance:

Voters entitled to receive assistance may receive it from anyone they choose, as long as the person providing assistance is not a candidate, the voter's employer, or the voter's union agent. Any person providing assistance should wear a face covering at all times while in the polling place, and must practice social distancing, to the extent feasible, from other individuals not within the same household.
